The Value of Our Water...

Storage Facilities : Water storage is important for a number of reasons. Not only does it provide water during times of high demand for your personal use, it also ensures that there will be enough water available for fire protection when needed.

The District operates and maintains five water storage reservoirs. These reservoirs are cleaned and thoroughly inspected every three years to ensure a high quality water supply while also maintaining the asset.

The Zone A Tank has been fully recoated and the remaining four tanks will be done in the next five years.

District Reservoirs

Zone A Reservoir	280,000 gallons
Zone A1 Reservoir	90,000 gallons
Zone B Reservoir	685,000 gallons
Zone C Reservoir	1,000,000 gallons
Zone C #2 Reservoir	150,000 gallons

Pressure Zones : The District operates and maintains six separate pressure zones which includes five booster pump stations.

Each of these elements in our District require regular testing and maintenance. The Booster Pump Stations are needed to ensure water flow to our higher elevations as well as to meet peak and emergency demands. Do you know which pressure zone you live in? Listed below are the different zones and their approximate locations:

Zone A is located primarily in the upper reaches of the Ranchland Subdivision including parts of Mountain Shadows Drive and Landmark Circle.

Zone A1 is currently the highest elevation which includes both Ledgewood Drive and parts of the Middletown Park area.

Zone B is considered to be the largest zone in the District and is located generally along Placer Road from the Muletown Road area to Towerview Circle.

Zone C serves the area along both sides of Placer Road from Towerview Circle to approximately Record Lane and includes areas in the vicinity of Boston Avenue.

Zone D covers the southern and eastern portions of the District which includes Chaparral, Power Line Road, Canto De Las Lupine and Clear Creek Road. Pressures to this area are controlled by three pressure-reducing stations.

*The Centerville Education Foundation (CEF)
Annual Art Auction & Appreciation Dinner
Win River Event Center - February 4, 2023 at 6 pm*

Please mark your calendar and join us for dinner, dancing, live student art auction, silent auction and dessert auction!

CEF is a non-profit organization that was formed to help provide enhanced educational opportunities for the Grant School District. This event raises funds to support our school, our teachers, our alumni and our children's futures. Please join us for a wonderful evening of fundraising. CEF is also accepting donations for the silent auction. Please contact either Grant School or the Centerville Community Services District if you would like to donate to our Silent Auction.

Why Do We Carve Pumpkins?

Did you know that the term, "Jack-o'-Lantern" comes from an old Irish folk tale called "Stingy Jack." Legend has it, that Stingy Jack invited the Devil himself to have a drink with him and tricked the Devil into picking up his bar tab! After Jack passed away, he was prevented from moving on to the after-life as punishment.

Jack was cursed to eternally wander the earth in the dead of night, with only a single coal ember to guide him. Jack would place his light in a hollowed-out turnip, and from that point onward, people began to call him "Jack of the Lantern" or "Jack-o'-Lantern" for short.

In reverence of this tale, the Irish began to carve out vegetables in his likeness. The carved produce served as a deterrent to keep Jack away, while lighting the way for good spirits. That's right! Pumpkins were not the first items that were decorated for what was known as "All Hallows Eve" because they did not really grow in Ireland. Turnips and other root vegetables were used instead.

After many Irish families immigrated to America in the 1800s, they found that Pumpkins made for excellent carving specimens. The tradition of Pumpkin carvings has stuck ever since. The tradition of lighting the way for spirits also carried over and is how carved pumpkins became associated with Halloween. Now, Jack-o'-Lanterns can be seen everywhere during October! And pumpkin carving has become an art!

SCHEDULED BOARD MEETINGS:

The next scheduled Board of Director's Meeting will be held **Wednesday, October 19th at 7:00 pm**. See agenda for details and Zoom login information.

The public is always welcome.

Average Water Usage for the month:

Compare the usage on your water bill with the average of the District.

September's Average: 5,400 cubic - feet.
